DETAILED ACTION

This office correspondence is response to a Request for Continued Examination filed on January 29, 2010

Claims 1 - 3, 5 - 15, 17 - 22, 24 - 26, 28 - 47, 50 - 52, 54 - 71, 73 - 75, 77 - 96, 98 - 100, and 102 - 111 are pending. Claims 4, 16, 23, 27, 48, 49, 53, 72, 76, 97, 101, and 112 are cancelled.

Reasons for allowance

The following is the examiner's statement of reasons for allowance

There is no teaching or suggestion in the prior art of the combination of claim limitations, among other things, as presented in claims 1 - 3, 5 - 15, 17 - 22, 24 - 26, 28 - 47, 50 - 52, 54 - 71, 73 - 75, 77 - 96, 98 - 100, and 102 - 111, specifically that transcoding metadata included in media signal conveyed via a home network from a first media format associated with a first media consumption device to a second media format detectable by a media metering device configured to meter a second media consumption device, The prior art doesn't teach or suggest querying the media metering device determining via the home network to determine a sensing capability of the media metering device to sense a media output signal from the media content consumption associated with a second media consumption device communicatively coupled to the home network, wherein the media metering device is to collect audience measurement data associated with the second media consumption device.

This is found in Applicant's specification on page 22, Paragraph 31.

The closest prior art found by the Examiner is the previously cited Reynolds et al., Neuhauser et al., and Eid et al.; however, this combination of references does not teach or suggest that collecting and communicating requests on an interface card by a collection control process sent to a control unit on a network element, The prior art doesn't teach or suggest querying the media metering device determining via the home network to determine a sensing capability of the media metering device to sense a media output signal from the media content consumption associated with a second media consumption device communicatively coupled to the home network, wherein the media metering device is to collect audience measurement data associated with the second media consumption device. For these reasons, in conjunction with the other claim limitations puts this case in condition for allowance.
